Descriptors-Colleges, *Directories, *Educational Programs, Junior Colleges, *Paraprofessional School
Personnel, Universities

This directory lists those institutions of higher learning throughout the United States which responded to a questionnaire as to whether they had operating or projected training programs for auxiliary personnel in education. A statistical summary of all data included in the directory is offered according to number of states reporting, number of institutions offering or considering programs as of fall 1968, and the components of operating programs which were reported. The rest of the document is divided into sections listing, by state, 2-year institutions offering training programs (with brief outlines of these programs including type, length, tuition, entrance requirements, financial assistance, and degree), 2-year institutions considering future programs, 4-year institutions offering training programs (with brief program descriptions similar to those for 2-year institutions), and 4-year institutions considering future programs. Department of Health, Education and
Welfare.

93439

The term "Auxiliary Personnel" is used to denote employees who, though lacking the traditional requirements for the education profession, perform auxiliary functions as defined by Webster's New World Dictionary, i.e., they "help, assist, and give aid and support" to the learning-teaching process. While this may not be the ideal term, it is more positive than "nonprofessional" or "paraprofessional" and more inclusive than "teacher aide." The latter generally refers to the entry level alone, not to assistants and associates; and to only one type of educational function -- teaching -- not to other functions, such as counseling, library services, and home-school relations, in which assistance is needed.

DIRECTORY PREPARED BY:

Gordon J. Klopf

INTRODUCTION

This Directory lists institutions of higher education which responded to a questionnaire distributed in the fall of 1968 to all two-year colleges affiliated with the American Association of Junior Colleges, and to all senior colleges and universities in the list of Presidents of Senior Colleges and Universities published by The Educational Directory. The questionnaire asked if the respondents had training programs for auxiliary personnel in education or were planning such programs.

The primary purpose of the Directory is to provide this information about existing and projected programs to planners, trainers, directors, and others seeking institutional cooperation for the training of auxiliaries and professionals.

The Directory may also serve as a guide to auxiliaries who are investigating programs in degree granting institutions, which offer them a means of achieving upward mobility.

Since this is a relatively new field, a high proportion of the respondents indicated projected rather than existing programs, as of the fall of 1968. Salient facts are presented in the Directory about existing programs, but only the name of the institution, the address, and the contact person are given for projected programs.

The multiplicity of projected programs reported indicates that this Directory will soon be obsolete -- a fact to be viewed with extreme satisfaction. Moreover, the replies are still coming in at the time of going to press. Hence this Directory will of necessity be incomplete. Ultimately, an expanded Directory might well include inservice training programs conducted by school systems. The Directory may be of some assistance, however, at a critical stage in the planning, as more and more institutions of higher learning collaborate with school systems in developing new partners in the American school.

A Directory, by definition, lists present and future programs rather than pace-setting programs of previous years which are not currently in operation. This Directory does not include the names of all the institutions which contributed to the burgeoning of educational opportunities for auxiliary personnel. It does record an educational trend of profound significance.

STATISTICAL SUMMARY

NUMBER OF STATES REPORTING: 45 plus Canada, Canal Zone and Puerto Rico

NUMBER OF INSTITUTIONS OFFERING OR CONSIDERING PROGRAMS AS OF FALL, 1968

	Institutions Offering Programs in Fall, 1968	Institutions Considering Programs	Total
Two-year colleges	83	120	203
